EDUCATION

University of Waterloo & Wilfrid Laurier University Waterloo, Ontario
Bachelor of Computer Science & Bachelor of Business Administration, Double Degree Sep. 2026 - Jul. 2031

- Relevant Coursework: Designing Functional Programs (CS 145), Algebra for Honours Mathematics (MATH 135), Calculus 1 (MATH 137)
- 99.5% high school graduating average; 1540 SAT (790 Math, 750 R/W)

WORK EXPERIENCE

Royal Bank of Canada Toronto, Ontario
Innovation Developer, RBC Embark Jul. 2026 - Aug. 2026

- Built an LLM-assisted incident dashboard for a Site Reliability Engineering team using Python, FastAPI, MongoDB, and TypeScript, consolidating issue data from 3 internal tracking systems
- Engineered a scheduled MongoDB ingestion pipeline that refreshed issue data while deduplicating incoming records to prevent existing issues from being overwritten
- Integrated an LLM API to parse and summarize lengthy, unstructured service-request descriptions, contributing to a 68% reduction in incident lookup time and helping streamline a 4-month issue backlog

FOES - Operational Consultancy Firm Toronto, Ontario
Business Analyst Intern Oct. 2025 - Mar. 2026

- Researched 75 private equity firms and authored a 41-page market analysis to support business development initiatives; presented findings to the senior partner
- Built AI-assisted GTM automations using Apollo and Clay to generate hundreds of targeted leads and streamline the sales pipeline

PROJECTS

The Pitch Deck | thepitchdeck.ca

- Built an opportunity-discovery platform for students using Next.js, React, TypeScript, and the Google Sheets API
- Designed a weighted matching algorithm that scores opportunities across user-interest criteria to rank personalized recommendations
- Implemented Google Sheets API synchronization to automatically propagate source-data edits to the live platform, and integrated an LLM to improve opportunity discovery
- Grew the platform to 2,000+ monthly site visits and won a $1,000 regional award in the Ingenious+ national youth innovation competition

Vital Signs - Energy Poverty Exploration Game | vital-signs-eight.vercel.app

- Developed a 2D interactive web game in TypeScript and React modeling the challenges and tradeoffs associated with energy poverty
- Integrated 120+ original sprites and environment assets into reusable gameplay and interface components

HONORS

University of Waterloo National Mathematics Scholarship ($20,000) May 2026

- Selected as 1 of 15 incoming mathematics students based on exceptional academic and extracurricular achievement

Ingenious+ National Innovation Grant Recipient ($1,000) Apr. 2026

- Recognized for The Pitch Deck with funding, mentorship, and recognition for Equity & Inclusion
